TITLE	Report on 1990-91 Public School Dropouts.
INSTITUTION	Texas Education Agency, Austin.
REPORT NO	GE2-072-03
PUB DATE	Jun 92
NOTE	49p.
PUB TYPE	Statistical Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	Dropout Characteristics; Dropout Rate; *Dropouts; Ethnic Groups; Graphs; High School Students; Junior High School Students; Middle Schools; *Public Schools; School Districts; *School Statistics; Secondary Education; *State Surveys; Tables (Data); Trend Analysis
IDENTIFIERS	*Texas

ABSTRACT

This report presents statistical data with analyses of dropouts in Texas for the 1990-91 school year. The data used in the report are based on enrollment in grades 7 through 12 and on school districts reporting the number of individuals absent for a period of 30 or more consecutive days. Section I, a state summary, includes the following types of information in tables and figures: (1) state summary counts; (2) dropouts by ethnicity; (3) dropouts by grade; (4) reasons for dropping out; (5) projection of cross-sectional and longitudinal dropout rates; and (6) discussion of future directions. Section II presents district groups in two tables, one detailing statewide dropout counts and rates by district groups, and the other presenting statewide dropout counts by ethnicity and by district groups. Section III offers data for each district indicating the number of dropouts by ethnic group, the annual dropout rate, and the estimated longitudinal rate. Overall, the data indicate that Texas schools continue to show significant reductions in the number of dropouts, with the number of reported dropouts having declined by 16 percent per year since 1987-88. The dropout rate has also shown similar improvement over the past 3 years with the rate decreasing by 41.2 percent. An appendix contains data standards for reporting on dropout students. Included are five graphs and eight tables. (JB)

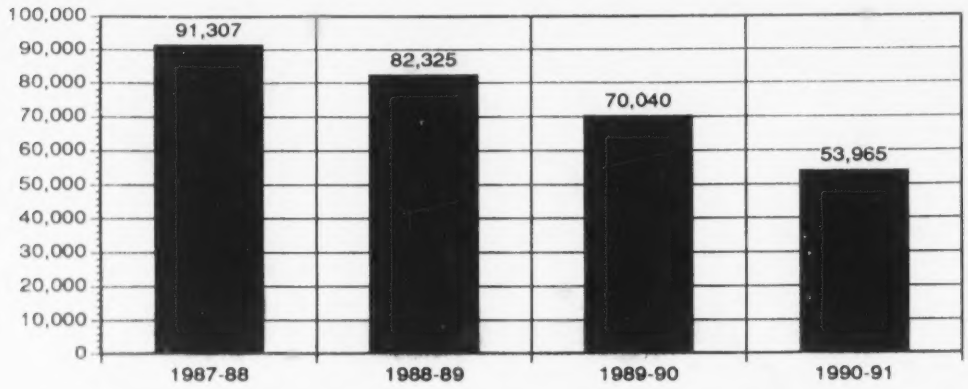
EXECUTIVE SUMMARY

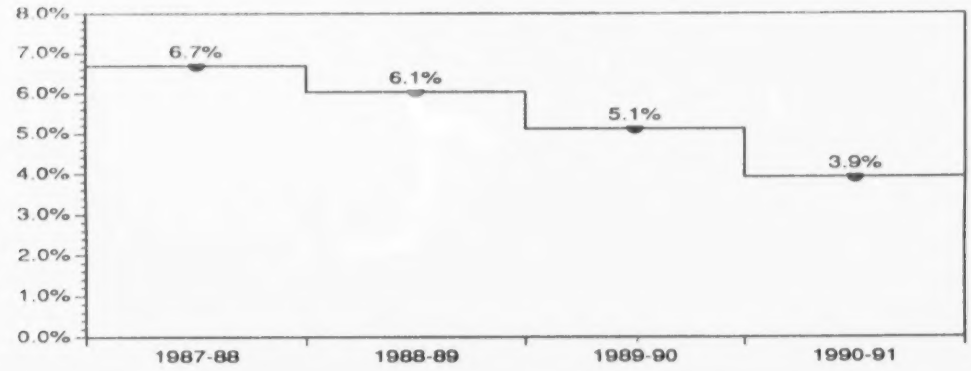
Texas schools continued to show significant reductions in the number of dropouts (see Chart 1). The number of reported dropouts has declined by 16.0 percent per year, since 1987-88.

Chart 1
Number of Dropouts by Year, 1988-91



The dropout rate has also shown similar improvement (see Chart 2). Over the past three years, the dropout rate has decreased by 41.2 percent.

Chart 2
State Dropout Rate by Year, 1988-91



The dropout data used in this report are based on enrollment in grades 7-12 and on school districts reporting the number of individuals absent for a period of 30 or more consecutive days. These data are used to determine the "event" dropout rate. This rate measures the proportion of students who drop out in a single year before completing high school. There is a concern with the definitional and reporting procedures which need continued refinement to ensure accuracy of conclusions that are drawn.

SECTION I

State Summary

Section I

STATE SUMMARY

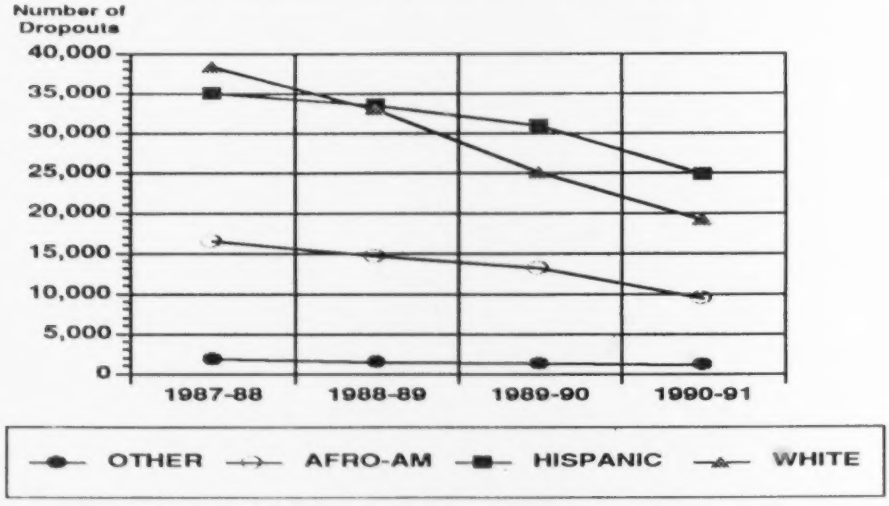
Summary Counts

The number of dropouts reported by school districts declined for the third consecutive year in 1990-91. In 1990-91, school districts reported a total of 58,417 dropouts, almost 12,000 fewer than the prior year. Implementation of the Personal Identification (PID) system for all students enrolled allowed the "recovery" of 4,452 of the reported dropouts. Recovered dropouts represent students reported as dropouts, but found to be enrolled in another district or reported as a dropout by another district. Thus, a total of 53,965 dropouts is being reported for the 1990-91 school year—a 23 percent decrease from 1989-90. This represents a 3.93 percent annual dropout rate. In general, considerable reductions in the number of dropouts reported each year have occurred since uniform dropout data have been collected through the Public Education Information Management Systems (PEIMS). A number of factors have contributed to these reductions, including:

- implementation of state and local dropout prevention programs;
- improved ability by local school districts to track dropouts;
- implementation of the statewide Personal Identification Number (PID) for all students enrolled in public school; and
- uniform acceptance of the standard dropout definition.

As shown in Figure 1, all population groups have experienced declines in the number of dropouts in each of the years reported.

Figure 1
1987-88 through 1990-91 Dropouts by Ethnicity



As shown in Table 1, both the annual and longitudinal dropout rates for various racial and ethnic groups have shown significant improvement over the last four years.

Table 1

AFRO-AM	9,318	192,504	4.84%	25.75%
HISPANIC	24,728	444,246	5.57%	29.08%
WHITE	18,922	703,813	2.69%	15.08%
TOTAL	53,965	1,372,638	3.93%	21.39%

Little data are available on the extent to which any one of the above factors has affected the number of dropouts reported. No assessment is made in this report of the impact of the above factors on the reduced state dropout rate.

The state as a whole appears to have made great strides toward achieving its dropout reduction goal. However, anecdotal evidence suggests that several key actions by the state and local school districts have contributed indirectly to the reduction of dropout rates. These factors include:

- implementation of the dropout rate as an indicator in the Academic Excellence Indicator System (AEIS);
- mandatory participation in the Equivalency Examination Pilot Program for school districts whose annual dropout rate is in the top quartile of all districts; and
- the lack of a statewide dropout audit procedure.

Dramatic decreases in the number of dropouts reported by many urban school districts, some by as much as fifty percent, indicate that local dropout definitional issues and tracking practices may have had a role in reducing the number of dropouts reported.

Characteristics of Dropouts

Table 2 presents selected dropout characteristics by grade. Overall, total dropouts have declined in all categories when compared with 1989-90. The percent of total dropouts reported economically disadvantaged rose from 25.9 percent in 1989-90 to 27.3 percent in 1990-91. Of the total number of dropouts, 5,231 (9.6 percent) were enrolled in special education, a 0.3 percentage increase from 1989-90. It is additionally estimated that 77.2 percent of the dropouts were not on an appropriate grade level based on reported age. Male dropouts are again more numerous at 54.6 percent than female dropouts at 45.4 percent.

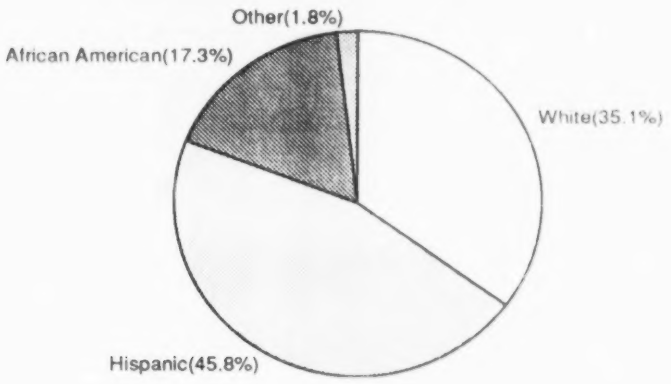
Table 2
Selected Dropout Characteristics
by Grade Level

Grade Level	Total Dropouts	Males	Females	Special Education	Economically Disadvantaged	Not on Grade
Seven	2,260	1,153	1,107	225	940	1,356
Eight	4,106	2,051	2,055	429	1,658	2,717
Nine	17,067	9,709	7,358	1,717	5,274	14,917
Ten	12,219	6,684	5,535	1,310	3,117	10,330
Eleven	10,029	5,493	4,536	953	2,166	7,557
Twelve	8,284	4,395	3,889	597	1,600	4,818
Totals	**53,965**	**29,485**	**24,480**	**5,231**	**14,755**	**41,695**

Dropouts by Ethnicity

Figure 2 presents ethnic totals as a percent of total dropouts. Minority students comprise approximately 48.7 percent of the 7-12 grade student population, but account for 69.1 percent of all dropouts. Dropout rates within ethnic groups are highest among Native Americans (6.5 percent) followed by Hispanics (5.6 percent) and African-Americans (4.8 percent), as shown in Table 3.

Figure 2
1990-91 Dropouts by Ethnicity



Dropouts by Grade

Figure 3 shows that most dropouts (31.6 percent) leave school in the 9th grade. Students leaving in the 10th and 11th grades account for an additional 22.6 percent and 18.6, percent, respectively, while 15.5 percent leave in the 12th grade.

	Grand Total	**53,965**	**1,372,738**	3.93%

Reasons for Dropping Out

Of the total 53,965 dropouts, 44.4 percent reported reasons for dropping out. The most frequently cited reason (11,218) was poor attendance. Additionally, 2,645 dropped out to pursue a job, 2,205 to enroll in a non-state approved GED program, and 1,522 to get married.

Times of Dropping Out

Table 5 lists the five categories of time school districts use to report when a dropout leaves school. Implementation of the PID system allowed Texas Education Agency (TEA) to filter out 100 dropouts who were enrolled by one district in a time period after another school district reported the same student as a dropout.

Table 5
Period of Dropout

Dropped out during regular school year	36,077
Failed to return to school in the fall after being promoted to or placed in the next grade the previous year	12,843
Failed to return to school in the fall after not being promoted to or placed in the previous year	4,403
Failed to return to school in the fall after completing grade 12, but did not pass exit TAAS, and did not graduate	434
Failed to return to school during the regular school year after completing grade 12, but did not pass exit TAAS test, and did not graduate	208
	53,965

Projection of Cross-Sectional and Longitudinal Dropout Rates

A requirement of the statute regarding dropout reporting is the projection of cross-sectional and longitudinal dropout rates for each of the next five years, assuming no action is taken by the state to reduce the rate. While trends in the annual rate of dropouts seem to indicate some improvement, it is not clear that such improvement will continue. Rates for the demographic subgroups are therefore assumed to remain at the levels indicated in Table 1. Table 6 presents the estimated rates for each grade level for the next five years if the rates for each subgroup remain constant at each grade level, indicating a slight worsening of the problem over the next five years if no change in rates takes place.

To project longitudinal rates, the same basic assumption that 1990-91 rates will remain constant is made. For ease of calculation, the longitudinal rate is calculated by subtracting the annual rate as a percent from 1.00, and raising the resulting retention rate to the sixth power. This has approximately the same effect as applying the grade-specific retention rates to a hypothetical population and then aging the population across all six grades. Table 6 presents these projected longitudinal rates.

Table 6
Estimated Dropout Rates by Grade
for Years 1991-92 through 1996-97

Grade Level	1991-92	1992-93	1993-94	1994-95	1995-96	1996-97
Seventh	0.93	0.93	0.93	0.93	0.93	0.92
Eighth	1.75	1.77	1.77	1.75	1.75	1.76
Ninth	6.27	6.31	6.37	6.36	6.31	6.31
Tenth	5.84	5.66	5.68	5.74	5.72	5.69
Eleventh	5.26	5.46	5.36	5.37	5.41	5.39
Twelfth	4.72	4.80	4.98	4.88	4.90	4.92
State Rate	4.07	4.10	4.12	4.10	4.10	4.10
Estimated Longitudinal Rate	22.07	22.21	22.31	22.21	22.21	22.21

It should be noted that the estimated longitudinal rate is only an estimate for comparison purposes, and does not purport to track students longitudinally. Many factors, such as student mobility, repeated exits and entries to the school system, and long-term outcomes for individual students, would have an impact on a true longitudinal rate.

In June 1990, the SBOE established dropout rate reduction goals under Section 11.205(a) Texas Education Code. This goal calls for annual declines in the dropout rate such that the longitudinal rate is no more than 5 percent in 1997-98. The implementation of the State Dropout Prevention Program represents significant action to reduce dropouts throughout the state.

Future Direction

Further analysis of these data has begun to shed some much needed light on the nature and extent of the dropout problem. The 1990-91 dropout data are promising, but the data also have sparked some additional questions as to the nature of the decrease in the total number of dropouts reported. Districts as a whole have met the challenge and have made significant reductions. The task now becomes identification of programs that have had the greatest impact on dropout reductions. Additionally, persistent issues such as disproportionately high dropout rates among ethnic minorities (see Figure 2) still need focus.

Another area of concern has to do with data reporting and lack of data quality assurance. Dropouts are reported by each school district, which attempt to accurately determine the current status of their students. However, data reported by the districts are not audited or reviewed. Without some knowledge of the accuracy of these data, the scope of the dropout problem will be more difficult to know. This problem will also affect the development of appropriate public policies, which is influenced by both the magnitude and mix of dropouts.

SECTION II

District Groups

Table 1 presents data for groups of districts showing the counts of dropouts, the annual rate, and the estimated longitudinal rate. Table 2 presents summary counts of dropouts by ethnic group for the same district groups.

APPENDIX

PEIMS Data Standards for Reporting Dropout Student Data

DROPOUT STUDENT DATA
Record Type 201

Definition of a dropout

A student shall be reported as a dropout for a school year if the individual is absent for a period of 30 or more consecutive school days: 1) without approved excuse or documented transfer from the public secondary school (grades 7-12) in which he or she enrolled, or 2) if he fails to reenroll during the first 30 consecutive school days in the following semester or school year without completion of a high school program. Documentation for approved excuses or transfers will be under standards set by the commissioner of education.

Dropout Reporting Period

This report will include the dropouts identified between September 1990 and August 1991. It will also include those students who fail to reenroll during the first 30 consecutive school days in the following year.

YES: include in dropout count	NO: do not include in dropout count
Students who drop out (by the definition)	Students who die
Students who are expelled with no evidence of entry into another state-approved school or program (to continue the student's secondary education)	Students who drop out (by the definition before 7th grade entry
Students who enter the military	Students who are out of school only for temporary periods with an approved excuse, e.g., by suspension, extended illness
Students from special education and other special, ungraded or state-approved alternative programs who drop out (by the definition)	Students showing regular attendance at a state-approved alternative program (full or part-time), in which the degree conferred is the high school diploma or GED certificate
Students who leave school and enter a program not qualifying as an elementary/secondary school (i.e., cosmetology school)	
Students who are enrolled in the Migrant Student Record Transfer System (MSRTS) during the year in which they leave school and whose whereabouts are unknown, and who do not have another school enrollment recorded on their MSRTS Education Record	Students who are enrolled in the Migrant Student Record Transfer System (MSRTS) during the year in which they left school, and who have a subsequent school enrollment on their MSRTS Education Record.
Students who leave school between terms, including summer leavers	Students known by acceptable documentation to have transferred to: - a public school - a nonpublic school or other state-approved educational program, that is, a program that continues a student's secondary education (i.e., adult education or another sate-approved alternative program) - home schooling

YES: include in dropout count	NO: do not include in dropout count
	Students who move to, or are placed in, another grade level
	Students who enroll in college early
	Students known to be transferred/shifted to another public institution, e.g., prison, juvenile institution, mental institution
	Students assigned to a state-approved educational program in a substance abuse correctional center

- State-approved educational programs are those provided by the accredited agencies listed in the Texas School Directory, as well as the Adult Education Cooperatives.
- Excused absences are defined in TAC 129.61, Requirements for Student Attendance Accounting for State Funding Pusposes, and TAC 129.62, Court-Related Students.
- Grade level of dropout refers to the grade of enrollment. Students who complete a grade, but do not return to school the following year, will be counted as summer dropouts with the grade level shown as the last grade completed.
- Acceptable documentation of transfer consists of either a documented request for transcript or a written signed statement from the parent or guardian. Students who are married (or 18 years or older) may sign their own statement of transfer. Acceptable documentation also includes verification by the superintendent or authorized representative that the child has been enrolled in a nonpublic school or another state-approved program or institution.
- Districts must use the SSN or state-approved alternative ID numbers when reporting dropouts.
- Dropouts are counted only once, and only for the year in which they left school. If a student fails to return when school begins in the fall, but does return by the PEIMS as-of-date, the student is not counted as a dropout.
- CAMPUS-ID refers to the identification number of the campus in which the student was last enrolled. If a student completes the eighth grade at a middle school (grades 6-8), and then fails to return to school at the high school (grades 9-12) the following fall, he is shown as a dropout from the middle school.
- A 100 record must be reported along with each 201 record.
- If the district was the absorbing district in a consolidation the prior year, the district must report the dropout data for the consolidated district.
- Refer to the instructions about the use of DEMOGRAPHIC-REVISION-CONFIRMATION-CODE in the Record Type 101 discussion.
